## **PREFACE**

The rapid advancement in science and technology that has occurred over the past four decades, undoubtedly, a milestone in the development of mankind. Inevitably, there has been a concomitant global explosion of information.

Today, scientific information is assembled and disseminated for application to further research and technological development, primarily in scientific journals. Many of these journals we find in academic and research libraries vary widely in scientific content literary presentation. Some are of high standard, some are of mediocre quality, and some are simply poor. This has been a sequel of sloppy science, over – enthusiasm to publish, and what the scientific community has dubbed “the publish or perish syndrome”. It is in the light of these facts that Sokoine University of Agriculture (SUA) has decided to formulate some criteria for recognition of journals. This brochure stipulates the criteria and the list of journals approved by SUA Senate. The subjects covered are many, encompassing physical sciences, agriculture, forestry, environment, veterinary sciences, economic development and library and information science.

It is expected that the list will be useful, in encouraging members of staff to submit their scientific manuscripts to such journals, and secondly, in assisting various SUA committees in reviewing staff performance in research; an exercise that has become an annual ritual.

To accommodate new and quality periodicals, this brochure will be updated from time to time.

## CRITERIA FOR RECOGNITION OF JOURNALS

(Approved by Senate during the 62<sup>nd</sup> meeting held on 24<sup>th</sup> June, 1993)

1. All journals/bulletins should be evaluated and registered with the Research and Publications Committee of Senate.
2. To be registered as a recognized Journal/bulletin, the following criteria will apply:
  - 2.1 The journal must have an editorial board whose members should be known by names.
  - 2.2 Target readership should include tertiary and research institutions.
  - 2.3 Types of articles should deal with basic and applied knowledge.
  - 2.4 Circulation of the journal should be wide covering national and international boundaries.
  - 2.5 Production of the journal should be by recognized methods such as conventional printing, electronic etc.
  - 2.6 Frequency of publication should be regular.
